

Telophase Corporation Kicks-off the 2010 Summer Internship Program for the NASA Office of Education

Arlington, VA – June 1, 2010

Telophase Corporation, a leading 8(a) systems integrator for the federal government, announced today the inception of the 2010 Summer Internship Program for the Office of Education at NASA Goddard Space Flight Center.

Telophase Corporation continues to provide Administrative Support, Program Support and Accounting Services Support. The Office manages NASA-wide fellowship, grants, and internship programs at GSFC, provides programmatic support for education-related programs within the various directorates and divisions at GSFC and supports projects to enhance the GSFC research and development missions through contracts with academia. The internships are four to ten weeks throughout the year. Within that range, there needs to be flexibility for shortened or longer durations. Interns are placed with GSFC mentor-identified projects.

“We are fortunate to continue our relationship with NASA Goddard’s Internship Program. We know the great history of this program and feel very privileged to be supporting NASA GSFC and the students”, said Phyllis Barton-Livornese, who is spearheading the NASA GSFC Programs for Telophase.

About NASA Education and Public Outreach

NASA grantees provide hundreds of programs, activities, events, and resources. Award-winning educational web sites, major exhibitions in museums and science centers, partnerships with minority universities, research projects that allow students and teachers to participate in NASA missions, live webcasts, and public television broadcasts on major science research areas are just a few of the opportunities available.

The success of this program depends, in part, on the scientists and engineers who conduct research for NASA. There are many avenues for participation by scientists and for such contributions to be recognized and acknowledged.

About Telophase

Founded in 1998, Telophase's mission is to provide innovative information technology solutions and services to federal and commercial clients by offering a unique value proposition that focuses on engaging customers in a highly tailored, personalized manner. Telophase empowers clients by assisting them in leveraging advanced technologies to improve productivity, enhance collaboration, secure information, streamline decision-making, and provide better service to their customers and stakeholders. Telophase associates have received numerous awards and accolades from clients such as the Department of Defense Tricare Management Activity (TMA) for their outstanding performance in support of the Military Health System (MHS) information systems environment.
